VOHRA
WOUND PHYSICIANS

Vohra's At Risk Skin Assessments Service

Help Prevent Wounds Before They Start

Vohra now offers At-Risk Skin Assessments for all patients—a proactive service focused on early detection and intervention. Working alongside your staff, we help identify potential skin concerns sooner, capture wounds early, and ensure timely care.

BENEFITS

Support for Nursing Staff
An extra layer of clinical expertise to assist with patient care.

Early Detection
Identify skin issues before they become wounds.

Improved Outcomes
Reduce hospitalizations and complications.

Risk Factor Documentation
Capture key risk factors to guide preventive care and support compliance.

Preparing for At-Risk Skin Assessments with your Vohra Provider

Prepare the Patients

- Assign nurses to prep patients before the provider arrives.
- Nurses can use their existing nursing skin assessment form to guide prep.
- Ensure patients are available and accessible for a head-to-toe skin exam.

Provide Access

- Grant the provider access to your EMR for chart review and documentation
- Assign the Vohra provider to the patient via PCC and MatrixCare.

Support Skin Assessment

- Assign 1–2 nurses to accompany the provider during assessments.
- Assist with patient history and follow-up on recommendations.

What to expect ?

- The provider will perform a **head-to-toe skin** exam with your nurse.
- **New wounds** will be documented and followed as Vohra patients.
- All findings are documented in the **Vohra EMR** for easy access.
- Frequency of Skin Assessments are dependent on facility needs
