Become a Vohra-Certified Center of Excellence in Wound Management

The Center of Excellence in Wound Management was created to highlight and identify facilities that have developed a superior wound management program. It can be used for PR on your website, in your local newspaper, on social media and on our website. **More importantly, it can drive admissions!**

Your facility must meet all criteria for this yearly distinction:

- Maintains a quarterly wound-related hospitalization rate of under 1%.
- Conducts regular quarterly meetings focused on comprehensive case reviews and Quality Assurance and Performance Improvement (QAPI) initiatives.
- Ensures designated Wound Care Certified Nurse to support patient needs and clinical oversight.
- Maintains an average of five weekly wound-care consults submitted to the Vohra provider for timely evaluation and intervention.
- Demonstrates a consistent commitment to quality, accessibility, and proactive wound-care management across all levels of care delivery.

Apply now to certify your skilled nursing facility!
