VOHRA
WOUND PHYSICIANS

Transforming Wound Care with

Ultrasound Mist Therapy

Vohra Wound Physicians now provides an innovative therapy to jump-start wound healing process.

Noncontact, low-frequency ultrasound therapy is performed with a device that delivers energy to the wound bed using a fine mist spray. Patients experience no pain and treatments are quick and effective.

Elevating Standard of Care

Specialized on stalled wounds and a new treatment line to achieve faster healing rates

Indications for Use

Wounds showing no improvement after 30 days of care or when debridement is contraindicated or painful.

Extensive Coverage

Available at multiple places of service for non-skilled patients with Medicare B or Managed Medicare.

Seamless Implementation

Clinicians fully equipped to provide a pain-free therapy with low disruption to day-to-day logistics

>86% wounds show improvement*
after just three applications

*Improvements on measurements and other tissues compared to baseline.
