

VOHRA
WOUND PHYSICIANS

MOST TRUSTED PARTNERS IN WOUND CARE

- **Weekly physician wound management at the bedside:** Clinically proven team approach to wound healing.
- **No cost to the facility:** Private insurance or Medicare billed directly for physician services.
- **Wound care procedures:** Physician removes tissue and treats wounds as needed to reduce infection, hospitalizations, time to heal and overall healthcare costs.
- **Physician documentation and PDPM:** Physician's notes and diagnoses available immediately after wound rounds and integrated with facility EHR to support PDPM documentation.
- **Wound care formulary adherence:** Physician recommends treatment consistent with facility formulary. Supports facility's fiscal viability.
- **Compliance with state regulations:** Physician available to discuss wounds with family members, caregivers, and PCPs as well as consult with state auditors when needed.
- **Wound education:** Physician provides in-servicing to educate nursing staff. Nurse focused wound care education and certification available.
- **Dermatological services:** Physician can treat urticaria, actinic keratosis and scabies. Complete skin biopsies as needed.
- **Feeding tube replacements:** Physician can reduce related visits to the emergency room or specialist's office.
- **Part B wound supplies:** Provided for qualifying patients upon request.
- **Medical Devices:** Physicians provide non-contact low-frequency ultrasound mist therapy and assess bacterial load with a wound imaging device, MolecuLightDX.
- **At-Risk Skin Assessment:** A proactive service designed to collaborate with nursing staff to identify early signs of skin issues and support your facility's wound prevention efforts.

88%*
Reduction in wound-related hospitalizations

21-Day*
Faster healing time and reduced risk of limb loss

Reporting
Facility and corporate level wound outcomes reports

Integration
PCC / MatrixCare / EHR integration

Additional Treatments
Skin Grafts, Ultrasound Mist, PICO, Moleculight
